

Programming Notes

Somehow different from computer notes.

Old Stack Overflow Q&A

Just in case SO ever disappears. The files are zipped single-page HTML archives.

- Python-style Array Slicing in C++
- I didn't understand about stack smashing and GDB
- Make sure udisks service is running
- QGraphicsScene Coordinates

Qt Recipes

Sometimes I forget how to do certain tasks with Qt's APIs. Sometimes I just want more concise solutions that snack overflow.

Path Manipulation

I'm used to python's `path.join`, here's how to do it in Qt:

- Create a `QDir` object and call its `filePath` method like:
`QDir("path/i/like").filePath("a_file_in_that_folder")`
