

# Mojave

A Color Scheme for Text Editors

```
1  # Python example of Mojave color scheme
2
3  import datetime as dt
4
5  |
6  class PythonExample:
7
8      def __init__(self):
9          self.name = "Python Mojave Color Scheme"
10         x = 1 + 3
11
12  if __name__ == '__main__':
13      pe = PythonExample()
14      print '{} example on {}'.format(pe.name, dt.datetime.today())
15
```

Mojave is a modified version of [Tom Ryder's Sahara color scheme for Vim](#). It is a light-on-dark background and is pretty easy on the eyes. Since I use a variety of text editors, I've ported it to [SublimeText](#), [PyCharm](#), [Visual Studio](#), and [Qt Creator](#).

The [files](#) are available from [Bitbucket](#).
